

CAPESTONE

SURFACE FINISHES

CAPESTONE is a Hermanus-based manufacturer of hand-cast paving, tiling, and architectural concrete solutions, delivering durable, specification-ready products for residential and commercial applications. Combining high-quality materials, controlled manufacturing, and PPC-tested performance, CAPESTONE offers reliable, low-maintenance surfaces designed to meet the demands of architects, landscapers, and contractors.

With a focus on natural stone aesthetics and innovative modern finishes, including Nacre (abalone shell-infused) polished concrete CAPESTONE provides versatile design solutions supported by a dependable supply network across the Western Cape.

PREMIUM SURFACE FINISH
NACRE POLISHED CONCRETE

Coastal elegance, underfoot.

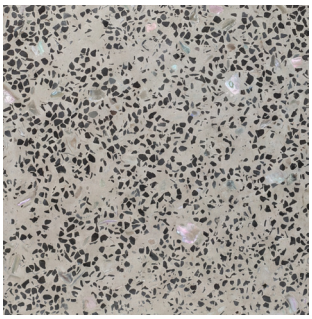

Our CAPESTONE premium Nacre Polished Concrete range is defined by the integration of crushed abalone shell within a refined concrete matrix, enhanced through a multi-stage hand polishing process by our team to reveal its distinctive depth, texture, and natural luminescence.

Each finish combines a selected stone base with carefully balanced pigments, resulting in a premium surface that offers both visual richness and technical durability for architectural and landscape applications. For a more understated finish, the same polished concrete aesthetic is also available without the nacre shell.

Available in Off Shutter Wall Cladding, Pavers, Tiles, Pool Copings, and Tile Copings sizes. Note that we do recommend sealing. We also provide non-slip additive for the sealer application. Sealers and Non-Slip Additives available in store.

PREMIUM SURFACE FINISH
EXPOSED AGGREGATE

CAPESTONE non-slip aggregate finish is achieved by removing the outer cement layer during production, revealing the embedded non-slip texture to create a slip resistant surface ideally suited to high use areas.

Each unit is hand-cast and produced with through-body pigmentation, ensuring long-term colour stability and resistance to weathering.

STANDARD COLOURS

CAPESTONE's standard colour range is developed using premium iron oxide pigments fully integrated into the concrete mix, ensuring consistent, through-body colour that maintains its integrity over time. Subtle tonal variation is inherent to the material, replicating the natural character of stone and providing architects and designers with a refined, authentic finish across applications.

TEXTURES

SLATE

A timeless stone-look finish, CAPESTONE's Slate is achieved by reproducing the layered texture of natural slate in concrete. The result is a softly textured surface with natural character, reliable grip, and versatile appeal across both residential and commercial spaces.

FLAMED GRANITE

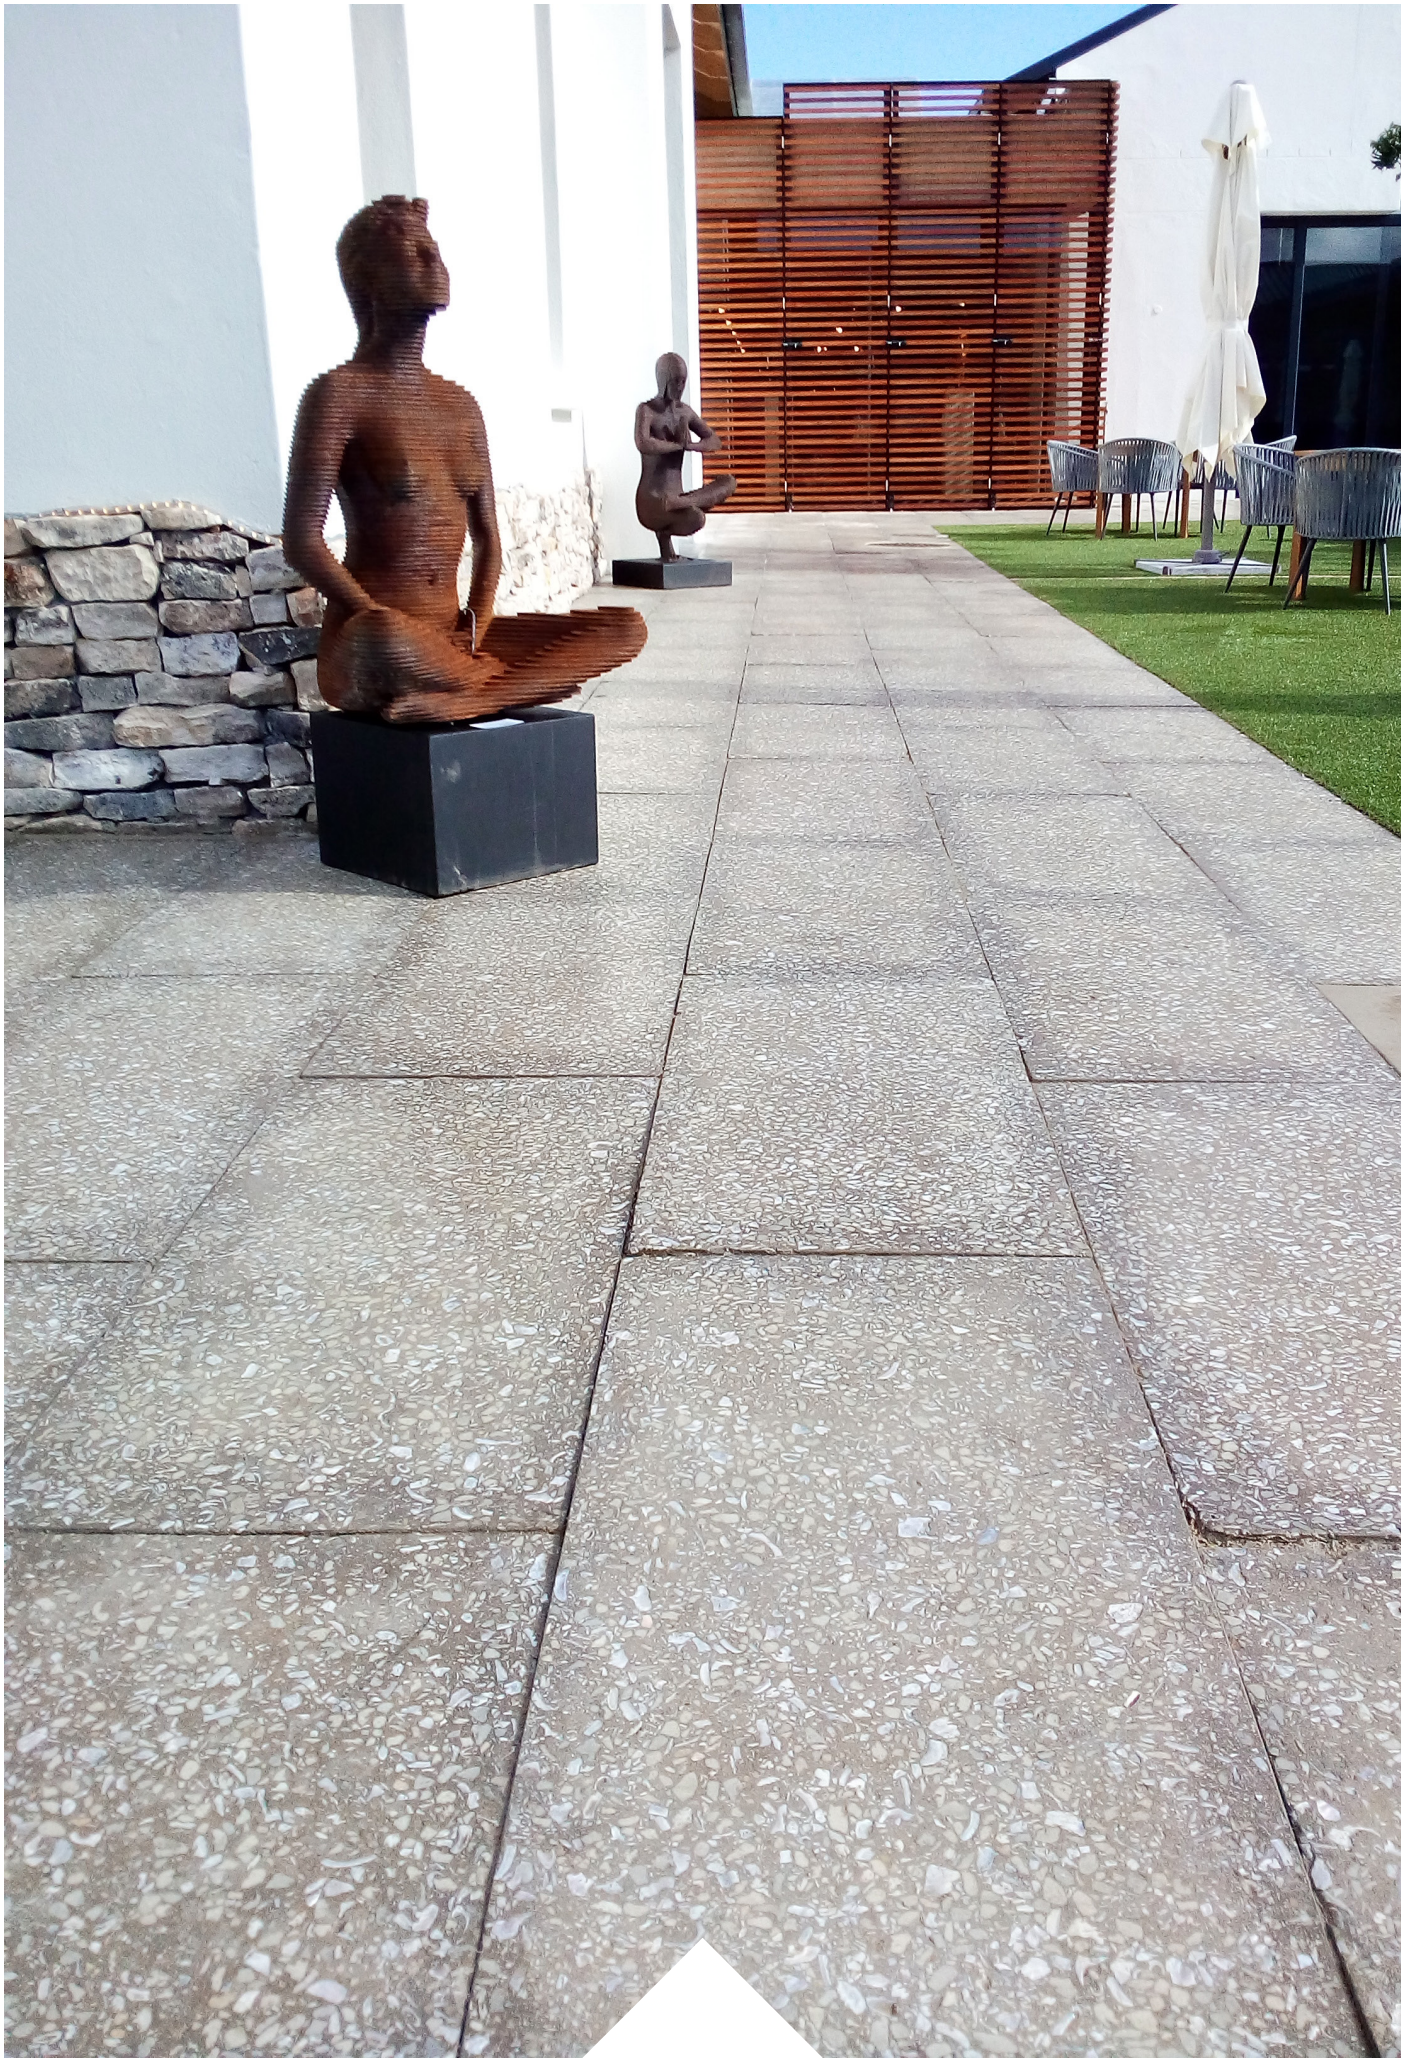

A clean, contemporary texture, CAPESTONE Flamed Granite has a refined exfoliated texture that delivers both visual sophistication and practical grip. Ideal for modern spaces, it combines the look of natural stone with durability and everyday performance.

FRENCH

French refers to a classic modular paving style that uses varied sizes to create a timeless, elegant layout with natural movement and visual interest. In CAPESTONE's French range, it appears to work together with a slate-like surface texture for a refined traditional finish.
